Subject: chronology

Good morning everyone,

Do we have a tight chronology of events? This just has to be the major items or actions.

For example:

August ...- release occurred as EPA/contractor was working at the site

August ...EPA notified...

(notification sequence would be helpful)

August....Unified Command was established

Summarize: as of August...### samples have been collected from ### locations along both the San Juan and Animas River.

Those type of highlights.

Thanks.
